Shrink Packaging Machine

Shrink Packaging Machine also known as Heat tunnels are designed to blow hot air onto film wrapped packages to make perfect shrink around packages. The heat settings and conveyor speed of the shrink tunnel can be adjusted to properly heat a shrink film. The heat applied to the shrink film enables the film to tightly conform to the product within the film. Shrink tunnels are equipped with difference type of conveyor eg. roller conveyor, Teflon net conveyor or Stainless Steel Mesh to deliver difference size of product through shrink tunnel.

Shrink tunnels can be combined with the Sleeve Sealer, L-Sealer machines or overwrapping machines for the ultimate wrapping solution.

Shrink Packaging Machine is widely used in industries such as foodstuff, beverage, pharmacy, cosmetics and pesticide for containers with labels like glass bottle, plastic bottle, paper cup etc.

CN-E Series PE Shrink Packaging Machine - Digital Temperature Control

CN-E Series Shrink Packaging Machine suitable all kind of shrinkable films especially PE Shrink Film. PE Shrink tunnel designed for production to pack heavy products or outer packing protection. CN-E Series Shrink tunnel equipped with heavy duty conveyor motor able to load heavy products.

CN-E Series Shrink Packaging Machines a fully re-circulating air chamber and Cooling fans on discharge end of tunnel. CN-E Series Shrink Packaging Machine equipped with desired modern specifications of digital temperature control, adjustable conveyor speed. CN-E Series Heat Tunnel are built using the 1/4 HP blower motors, dead roller conveyor system, heating circulating type, silicon fiber tube on the conveyor rods.

CN-E Series Shrink Packaging Machine are long lasting machineries built with selected high quality electronic components and therefore will require lesser maintenance.

Optional: a. Stainless Steel Structure b. Customized specifications are available.
