Carton Erector

Carton Erectors Machine erect, pack, and seal case bottom, and can also unpack cases products. Most case erectors are used to erect cardboard boxes, Carton Erectors seal bottom side of boxes with tape. A carton erector is required to complete automatic packing line.

Carton Erector is used in the mass production line of domestic electrical appliance, foodstuffs, general merchandise, medicine and chemical industries. Carton Erector save time, save money and improve efficiency.

CHS6701 Automatic Carton Erector - Vertical Type

CHS-6701 Vertical Type Automatic Carton Erector fit for automatic packaging system, opening, forming, folding and sealing action for the bottom side of carton with tape at the same time. These system fits for automatic production line. CHS-6701 Automatic Carton Erector may adjust manually for different sizes carton.

CHS-6701 Vertical Type Automatic Carton Erector with Vertical type storage can supply the un-opened carton anytime. Machine Installed with touch-screen panel and PLC controlled-- program alter-able.

CHS-6701 Vertical Type Automatic Carton Erector are long lasting machineries built with selected high quality electronic components and therefore will require lesser maintenance.

Optional: a. Stainless Steel Housing b. Taping End L70±5 (mm) c. Detection for no tape and NG taping function d. Customized specifications are available.

TECHNICAL DATA

Model	CHS6701
Function	Side Drive
Rated Voltage	3 Phase 415V
Power Supply	800W
Tape Width	2" or 3" (according to customer need)
Taping End	60 ± 5mm
Cardboard Storage	Approx. 90 - 100 pcs (depends on carton's size and material)
Carton Dimension	250 - 500mmL x 170 - 395mmW x 90 - 500mmH
Capability	8 - 10 Ctn / min (depends on carton's size and material)
Working Table Height	650mmH
Air Compressor (equipped by customer)	0.5 - 0.6 Mpa
Machine Housing	Iron (Powder Coated)
Machine Dimension	2290mmL x 2260mmW x 1750mmH
Machine Weight	450 Kg
