## Carton Sealer

Carton Sealer is a packaging machine that applies adhesive tape to the bottom and / or top of a cardboard box so securely sealing the contents within. Carton Sealer is mainly used to seal cartons, which can operate alone or equipped into production line. Carton Sealer suitable for production where the size of cartons does not change frequently, especially fits for production required continuous sealing of cartons in the same size.

Carton Sealer is common used in the fields of domestic electrical appliance, foodstuffs, general merchandise, medicine and chemical industries. Carton packaging machine save time, save money and improve efficiency.

### *CSC4030S Semi-automatic Carton Sealer - Side Drive*

CSC4030S is a economic version Carton Sealer for lighth user. CSC4030S Carton Sealer design with side drive special for small boxes and able to load product weight up to 20kgs. CSC4030S Carton Sealer able to adjust manually by crank handle for difference carton width size anytime.

#### TECHNICAL DATA

◀ <b>Model</b>	<b>CSC4030S</b>
Function	Side Drive (2 Motor)
Power	1 Phase 240V / 200W
Width of Adhesive Tape for Sealing	48mm (2 inch)
Taping End	50 ± 5mm
Carton Dimension	130 - ∞mmL x 80 - 300mmW x 90 - 400mmH
Maximum Loading Weight	< 20 Kg
Sealing Speed	20 M/min
Working Table Height	700mmH
Machine Housing	Iron
Machine Dimension	1305mmL x 711mmW x (1200 - 1600)mmH
Machine Weight	88 Kg
