Carton Sealer

Carton Sealer is a packaging machine that applies adhesive tape to the bottom and / or top of a cardboard box so securely sealing the contents within. Carton Sealer is mainly used to seal cartons, which can operate alone or equipped into production line. Carton Sealer suitable for production where the size of cartons does not change frequently, especially fits for production required continuous sealing of cartons in the same size.

Carton Sealer is common used in the fields of domestic electrical appliance, foodstuffs, general merchandise, medicine and chemical industries. Carton packaging machine save time, save money and improve efficiency.

FXJ5050A Semi-automatic Carton Sealer - Side Drive

FXJ5050A Carton Sealer design with side drive for packing heavy product weight below 25kgs. FXJ5050A Carton Sealer able to adjust manually by crank handle for difference carton width size anytime.

Optional: a. 76mm (3 inch) taping head

TECHNICAL DATA

Model	FXJ5050A
Function	Side Drive (2 Motor)
Power	1 Phase 240V / 200W
Width of Adhesive Tape for Sealing	48mm (2 inch)
Taping End	50 ± 5mm
Carton Dimension	150 - ∞mmL x 130 - 500mmW x 120 - 500mmH
Maximum Loading Weight	< 25 Kg
Sealing Speed	20 M/min
Working Table Height	580 - 780mmH
Machine Housing	Iron
Machine Dimension	1730mmL x 950mmW x (960 - 1550)mmH
Machine Weight	120 Kg
