Carton Sealer

Carton Sealer is a packaging machine that applies adhesive tape to the bottom and / or top of a cardboard box so securely sealing the contents within. Carton Sealer is mainly used to seal cartons, which can operate alone or equipped into production line. Carton Sealer suitable for production where the size of cartons does not change frequently, especially fits for production required continuous sealing of cartons in the same size.

Carton Sealer is common used in the fields of domestic electrical appliance, foodstuffs, general merchandise, medicine and chemical industries. Carton packaging machine save time, save money and improve efficiency.

FXJ8070B Semi-automatic Large Carton Sealer - Top & Side Drive

FXJ8070B Carton Sealer design with top and side drive for packing large carton and heavy product weight below 35 kgs. FXJ8070B Carton Sealer able to adjust manually by crank handle for difference carton width size anytime.

Optional: a. 76mm (3 inch) taping head

TECHNICAL DATA

| Model | FXJ8070B |
|------------------------------------|---|
| Function | Top & Side Drive (3 Motor) |
| Power | 1 Phase 240V / 360W |
| Width of Adhesive Tape for Sealing | 48mm (2 inch) |
| Taping End | 50 ± 5mm |
| Carton Dimension | 150 - ∞mmL x 150 - 700mmW x 150 - 800mmH |
| Maximum Conveyor Loading Weight | < 35 Kg |
| Sealing Speed | 20 M/min |
| Working Table Height | 580-780mmH |
| Machine Housing | Iron |
| Machine Dimension | 1230mmL x 1100mmW x (1620 - 1820)mmH |
| Machine Weight | 160 Kg |
