Foot Impulse Sealing Machines

Foot Impulse Sealing machines (also known as Foot Sealers) are recommended for light to medium duty operations. They can seal various kinds of materials, such as BOPP, PE, laminations, and cellophane. This type of unit is activated by pushing on a pedal, and the machine will operate for the pre-set length of time.

Foot Impulse Sealing machines are easy to use (no warm-up time), economical (electricity is only used when the jaw is lowered during the sealing process), and safe (no component of these devices is always hot) which is commonly used for sealing operations in packaging candies, food, stationery, drugs, tools, replacement parts and a variety of other products.

KSH Foot Impulse Sealing Machines

KSH Foot Impulse Sealing Machines is standing console design with single heat sealing jaw designed for sealing of thermoplastic films. KSH Foot Impulse Sealing Machines equipped with sealing width 3mm. KSH Foot Impulse Sealers are easy to operate, no operator training required.

KSH Foot Impulse Sealing Machines are long lasting machineries built with selected high quality electronic components and therefore will require lesser maintenance.

Optional: a. Change to Round Element for Cutter function (for seal and trim excess material- e.g. tubing film, in order to make customized bags)

TECHNICAL DATA

MODEL	KSH 24
Voltage	1 Phase 240V
Impulse Power	1500W
Sealing Length	600mmL
Sealing Width	3mm
No of Sealing Line	1
Sealing Jaw	Bottom Only
Heat Time	0 - 2 sec.
Cooling Time	0 - 5 sec.
Machine Structure	Insulated Board Table Top with metal frame
Working Table Height	750mmH
Machine Dimension	370mmL x 720mmW x 780mmH
Machine Weight	40Kg

** Customized specification available upon request.
