Foot Impulse Sealing Machines

Foot Impulse Sealing machines (also known as Foot Sealers) are recommended for light to medium duty operations. They can seal various kinds of materials, such as BOPP, PE, laminations, and cellophane. This type of unit is activated by pushing on a pedal, and the machine will operate for the pre-set length of time.

Foot Impulse Sealing machines are easy to use (no warm-up time), economical (electricity is only used when the jaw is lowered during the sealing process), and safe (no component of these devices is always hot) which is commonly used for sealing operations in packaging candies, food, stationery, drugs, tools, replacement parts and a variety of other products.

KSV Foot Impulse Sealing Machines

KSV Foot Impulse Sealing Machine is vertical standing console design with single heat sealing jaw designed for sealing of thermoplastic films. KSV Foot Impulse Sealers equipped with sealing width 3.2mm. KSV Sealer design with adjustable working table increase the flexibility of sealing for different product height. KSV Sealers are easy to operate, no operator training required.

KSV Foot Impulse Sealing Machines are long lasting machineries built with selected high quality electronic components and therefore will require lesser maintenance.

Optional: a. Change to Round Element for Cutter function (for seal and trim excess material- e.g. tubing film, in order to make customized bags)

TECHNICAL DATA

MODEL	KSV 26
Voltage	1 Phase 240V
Impulse Power	2000W
Sealing Length	660mmL
Sealing Width	3mm
No of Sealing Line	1 OR 2
Sealing Jaw	Bottom Only
Heat Time	0 - 2 sec.
Cooling Time	0 - 5 sec.
Machine Structure	Powder coated metal control box and metal frame
Working Table Height	Adjustable
Machine Dimension	570mmL x 770mmW x 1180mmH
Machine Weight	60Kg

** Customized specification available upon request.
