Handheld Pneumatic Bottle Capper

Pneumatic Handheld Capper is a portable cap tightened, capable of tightening or removing screw type caps. An adjustable clutch reduces cap damage and reduces insert wear. Pneumatic Handheld Capper is simple to operate, quiet, comfortable to use, and provide outstanding repeatable torque accuracy.

XG Series Handheld Pneumatic Bottle Capper

XG Series Bottle Cappers tighten screw and lug caps from 15mm to 120mm in diameter. XG Series Bottle Cappers complete with a spring loading balancer to reduce the capper weight in the hands of the operator. With balancer operator easily to lower the capper down onto the cap with very little effort and after the cap has been tightened, the balancer raises the capper back to position.

Please specify cap size(s) for proper chuck selection when ordering. It may be necessary to purchase additional chucks for different sized caps.

TECHNICAL DATA

◀ Model	XG Series	
Voltage	No Power Required	
Air Pressure (MPa)	0.5 - 0.6	
Capping Speed	1 - 60 bottles/min	
Chuck Diameter Size Range (One piece of Chuck included)	XG15	15MM-30MM
	XG30	30MM-50MM
	XG50	50MM-70MM
	XG70	70MM-90MM
Machine Weight	13 Kg
